Seminal Weakness.

Seminal emission is the consequence of self-abuse. This solitary vice, or deprayed sexual induspence, is practiced by the youth of both sexes to an almost unlimited extent, producing with unerring certainty the following train of morbid symptoms, unless combatted by scientific medical measures, viz. Soliow countenance, dark spots under the eyes, pain in the head, ringing in the ears, noise like the restling of caves or rattling of charlots, uncastness about the loins, weakness of the limbs, confused vision, blunted intellect, loss of confidence, diffidence in approaching strangers, a disposition to shun society, loss of memory, plingles and various cruptions about the face, heetic flushes, furred tongue, festid breath, coughs, consumption, night sweats, monomania and frequently insanity. If relief be not obtained, you should apply immediately, either in person or by letter, and have a cure effected by his new and scientific mode of treating disease, which never falls of effecting a quick and radical cure.
